Jump starter KS JS-1400 can instantly start 12V vehicles up to 10.0-Liter gasoline or 6.0-Liter diesel engines.

SAFETY WARNINGS

2

ATTENTION – DANGER!

No charging the product in unattended places!

WARNING!

To keep away from fire, electric shock or any damage to your car, please follow the warnings below:

- Do not throw or hit hard. Do not disassemble or reinvent. Do not place in liquid or fire. Do not expose to high temperature. If the product is damaged, please stop using it.
- Do not allow children to touch the product, this is not a toy. People without safety awareness and normal behavior should use this product under the supervision and guidance of a legal guardian.
- Do not clamp both battery terminals together or clamp on the same piece of metal. Otherwise, it may cause safety accidents.

MAIN OVERVIEW

3

1. Charge port
2. USB output port
3. Quick charge inlet
4. DC anti-reverse insertion car start entrance
5. Smart digital display
6. LED Lighting
7. Main switch
8. LED light switch

THE PACKAGE INCLUDES:

- Jump starter
 - Packaging
 - Operating instruction
 - Accessories storage bag
9. Smart clamp
 10. USB charging cable

IMPORTANT!

Manufacturer reserves the right to make changes and/or improvements in design, components set and technical attributes without notice and without incurring obligation. The pictures in this manual are schematical and may not match the parameters of original product.

TECHNICAL SPECIFICATION

3

Model parameters	KS JS-1000	KS JS-1400
Battery	12000 mAh	18000 mAh
USB output	5V/3A, 5V/2A	5V/3A, 5V/2A
USB input	5V/3A	5V/3A
Rated starting current	500 A	700 A
Peak current	1000 A	1400 A
Charging time	4-5 hours	4-5 hours
Dimensions (LxWxH), mm	195×100×37	195×100×37
Working temperature	(-20 °C) – (+60 °C)	(-20 °C) – (+60 °C)

HOW TO USE LED EMERGENCY LIGHTING

Press and hold the key for 3 seconds to turn on the flashlight, then the light button function changes from solid light to flashing, SOS distress signal light.

Press and hold again for three seconds to turn off the flashlight.

HOW TO CHARGE THE PRODUCT?

Connect the charging head/charging cable to the charging interface, and connect the other end to 220V household electricity or 12V car charging. When the charging process starts, the display shows flashing "IN" letters. This means that charging is in process. When "IN" stops flashing - the battery is full.

DESCRIPTION OF THE DISPLAY SCREEN OF THE CAR EMERGENCY STARTER:

1. Turn on the main switch on the side of the car's emergency start power supply, and lightly press the display switch to display the power.
2. There is a virtual power when you use it for the first time.

HOW TO CHARGE THE PHONE OR LAPTOP?

Plug in the charging cable, and then short press the power button to charge the phone or laptop.

USB QC slot 5V/3A for phone

USB charging slot 5V/2A

JUMP STARTER CHARGING INSTRUCTIONS:

To charge your phone or other device from the power bank, you need to connect the charging cable to the USB port. When connected to the standard port, it will display "OUT 5V/2A," and when connected to the fast charging port, it will display "OUT 5V/3A."

HOW TO START A CAR WITH A FLAT BATTERY:

WARNING!

The device is suitable only for 12V batteries!

When starting the car, please confirm that the power of the product is more than 20%.

STEP 1: Open the silicone stopper of the product and insert the battery clamp into the corresponding hole of the product.

STEP 2: Connect the battery clamp to the positive and negative poles of the car battery (Red for the positive terminal and black for the negative terminal).

STEP 3: Start the engine. Do not cycle the jump starter for more than 3 seconds, pause for 1 minute between jump start attempts. This is necessary to let the jump starter battery cool down.

STEP 4: The plug is withdrawn from the jump starter first, and then the battery clips are removed from the positive and negative terminals.

When the connection is successful, the indicator lights up green.

The red light indicates that the supply voltage is too low or that the positive and negative electrode terminals have been swapped.

TROUBLESHOOTING

6

HOW TO USE THE INTELLIGENT BATTERY CLAMPS?

When the intelligent battery clamps are connected to the jump starter and car battery, the light indicator stays on green and the buzzer does not sound, which is the on state and can start the car normally.

AUTOMATIC SHUTDOWN

The product has an intelligent detection function. Once there is no load, or the electronic devices are fully charged, it will be automatically powered off to save power.

HOW LONG WILL IT TAKE TO CHARGE THE PRODUCT?

4 – 5 hours.

To extend the device's service life, we recommend keeping the device charged to at least 50% and checking the charge level every month.

WARNING

7

1. Read the operating instructions carefully before using the device.
2. The device must never be used as a substitute for a car battery.
3. Keep children and animals away from the working area of the device.
4. Only use the jump starter for 12 V batteries.
5. Keep the clips and their connection points clean and tidy. Never connect the clips together.
6. Avoid using the device near explosive substances, flammable gases, or in dusty environments.
7. Avoid overheating the device, smoking near the device, and exposing the device to extreme moisture; keep the device away from open flames and never immerse it in water.
8. The device must not be stored at temperatures exceeding 60 °C.
9. After successfully jump-starting the vehicle, disconnect the jump starter from the battery within 30 seconds to prevent equipment damage.
10. Do not use the jump starter cable to charge other devices.
11. Keep it supervised while charging.
12. Using the device at current and voltage ranges other than those specified on the device nameplate may cause charging and discharging problems and deterioration of battery capacity and performance. This is also dangerous and may cause the device to malfunction.
13. When the battery is stored for more than three months, the product needs to be charged to ensure the normal performance of the product.

14. Never do anything that may cause mechanical damage to the device.
15. Do not disassemble or transform the product without authorization.
16. If the device casing is bulged, leaking, or giving off an unpleasant odor, stop using the device immediately.
17. If you notice battery acid leaking from the battery, do not touch it with bare hands. If battery acid contacts the skin or eyes, rinse immediately with plenty of running cold water and soap. Flush eyes for at least 10 minutes. Seek medical advice if necessary.
18. The device features a lithium rechargeable battery that must be disposed of under the applicable laws in your country.
19. Please connect the starting cable correctly according to the manual.
20. Never attempt to jump-start the vehicle in continuous mode! With standard power, the start cycle should take no more than 3 seconds, and the interval between cycles should be at least 1 minute. Do not exceed 3 consecutive start attempts.
21. After starting the car with the starting power, the temperature of the starting power supply itself will rise, please do not charge the starting power at this time, at least 8-10 minutes before charging.
22. Only use the jump starter cable supplied with the jump starter.
23. Do not charge the device immediately after jump-starting the vehicle's battery.
24. Never use the device to start the vehicle's battery and charge the device's internal battery simultaneously.

WARRANTY SERVICE TERMS

6

The international manufacturer warranty is 1 year. The warranty period starts from the date of purchase. In cases when warranty period is longer than 1 year according to local legislation please contact your local dealer. The Seller which sells the product is responsible for granting the warranty. Please contact the Seller for warranty. Within the warranty period, if the product fails because of defects in the production process, it will be exchanged on the same product or repaired.

All faults caused by the manufacturer during the warranty period will be eliminated free of charge. Warranty repair is carried out only if you have a fully completed warranty card, the Buyer's signature of acceptance of the warranty terms, as well as a document supporting the purchase (cash receipt, sales slip or invoice). In the absence thereof, as well as in the event of errors or corrections not authenticated by the seller's seal or illegible inscriptions in the warranty card or tear-off coupon, no warranty repair is carried out, no objections to quality are accepted and the warranty card is withdrawn by the service center as invalid. The device is accepted for repair clean and full.

EC Declaration of Conformity

Nr. 159

The following products have been tested by us with the listed standards and found in compliance with the European Community Electromagnetic compatibility Directive (EMC) 2014/30/EC.

Manufacturer: DIMAX INTERNATIONAL GmbH
Address: Flinger Broich 203, 40235 Duesseldorf, Germany
Product: Jump starter "Könner & Söhnen"
Type / Model: KS JS-1000, KS JS-1400

The statement is based on a single evaluation of above mentioned products. It does not imply an assessment of the whole production and does not permit the use of the test lab. logo. The manufacturer should ensure that all product in series production are in conformity with the product sample detailed in this report. The applicant should hold the whole technical report at disposal of the competent all the right.

Applied EC Directives: 2014/30/EU Electromagnetic compatibility Directive (EMC)
